Kenya Certificate of Secondary Education (K.C.S.E)

ADM NO.

INSTRUCTIONS TO CANDIDATES:

NIAME.

- Write your name and index number in the spaces provided above. (i)
- (ii) **Sign** and write the **date** of examination in the spaces provided **above**.
- (iii) Answer **ALL** the questions in the spaces provided in the question paper.
- You are not allowed to start working with apparatus for the first 15 minutes of (iv) $2^{1}/_{4}$ Hours allowed for this paper. This time is to enable you read the question and make sure you have all the chemicals and apparatus required.
- (iv) Mathematical tables and silent electronic calculators **may be** used.
- (v) All working **must be** clearly shown where necessary.
- Candidates should check the question paper to ascertain that all the pages (vi) are printed as indicated and that no questions are missing

FOR EXAMINER'S USE ONLY:

QUESTION 1

- (a) You are provided with the following
 - (i) Sulphuric(VI) acid labeled a solution D
 - (ii) Solution R prepared by dissolving 40g of NaOH in 400cm³ of distilled water and made up to 1 litre.

You are required to determine the molarity of Sulphuric (VI) acid.

PROCEDURE

- (i) Fill the burette with Sulphuric (VI) acid.
- (ii) Using pipette and pipette filter place 25cm³ of solution R into conical flask.
- (iii)Add 2-3 drops of phenolphthalein indicator.
- (iv)Titrate solution R against solution D.
- (v) Repeat the titrations to obtain two concordant titrates
- (vi)Record your results in the table below.

| 1)1100014 Jour results in | | | |
|----------------------------|---|----|-----|

- b) You are provided with the following;
 - (i) 0.85M HCL labeled solution N.
 - (ii) Sodium hydroxide labeled solution K.

You are required to determine the molar heat of neutralization of solution N

Procedure

- i. Measure 50cm³ of solution N and transfer it into a 250cm plastic beaker provided.
- ii. Record the initial temperature of solution N to the nearest 0.5° c.
- iii. Rinse the burette thoroughly with distilled water and fill it up to the 0.0cm³ mark with sodium hydroxide solution (Solution K)
- iv. From the burette add 10cm³ of solution K to solution N in the beaker. Stir gently with the thermometer and record the new temperature in the table below.
- v. Continue adding 10cm³ portions of Solution K recording new temperature after each addition until 80cm³ of K has been added

| Volume of Solution K | 0 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 |

QUESTION 3

You are provided with solid J. carry out the tests below and record your observation and inferences to the spaces provided.
 Place a half of Solid J in a clean metallic spatula and ignite it on Bunsen burner flame.
